PROFILE

Student at 1337 School (UM6P), following the 42 Network curriculum and developing skills in full stack development and DevOps. Practical project experience in C and C++, Unix processes, networking, concurrency, and containerized infrastructure. Currently learning React, Next.js, TypeScript, and backend development, with a focus on building web applications and understanding how they are deployed.

TECHNICAL SKILLS

Programming	C, C++, Bash; JavaScript and TypeScript (learning)
Web development	HTML, CSS; React, Next.js, Node.js (learning)
Infrastructure	Linux, Docker, Docker Compose, NGINX, HTTPS configuration
Data & tools	MariaDB / MySQL, Git, GitHub, Makefile, VS Code
Systems foundations	Processes, sockets, pipes, signals, POSIX threads, mutexes

SELECTED ACADEMIC PROJECTS

TalentFit — Interview preparation & company labs platform

In progress · Project Manager & Full Stack Developer · Team project

Collaborating on a platform connecting student developers and recruiters through interview preparation and company-defined coding labs. Planned workflows include coding workspaces, submissions, AI-assisted feedback, and company-initiated student chat.

Responsible for the student experience and relevant APIs, including profiles, dashboards, opportunity discovery, and preparation flows. Coordinate delivery, dependencies, and team blockers as Project Manager.

Full stack development · Student experience · API integration · Delivery coordination

Inception — Containerized web infrastructure

Built a WordPress stack with separate NGINX, PHP-FPM, and MariaDB containers. Configured HTTPS, an internal Docker network, persistent volumes, and file-based secrets. Automated service initialization with Bash scripts and managed the stack through Docker Compose and a Makefile.

Docker · Docker Compose · Linux · NGINX · MariaDB · Bash

ft_IRC — Collaborative IRC server

[Repository ↗](#)

Contributed to a C++ IRC server using TCP sockets and poll. Worked on message parsing, client authentication and registration state, and command handling including PASS, NICK, and JOIN.

C++ · TCP/IP · Sockets · poll · Git collaboration

Minishell — Unix command-line shell

Developed a shell as a pair project, covering command parsing, built-in commands, process execution, pipelines, redirections, environment variables, and signal handling.

C · Unix · fork / execve · Pipes · Signals

Philosophers — Concurrent programming

Implemented the Dining Philosophers simulation using POSIX threads and mutexes, coordinating shared resources and monitoring timing and starvation.

C · pthreads · Mutexes · Synchronization

Additional coursework: Cub3D (raycasting), Born2BeRoot (Linux administration), NetPractice (networking), libft, Push_Swap, and C++ modules.

EDUCATION

1337 School (UM6P) — 42 Network	2024 - Present
Project-based software development curriculum · Morocco	
Systems programming, algorithms, C/C++, networking, and containerized services.	
Diploma in Office Computing (Bureautique)	2024
Baccalaureate — Life and Earth Sciences (SVT)	2022

LANGUAGES

Darija (Moroccan Arabic) · French · English: intermediate, self-assessed B1-B2

INTERESTS

Full stack applications, DevOps, software architecture, motorcycles, and sports.
